

365 SERIES HEAVY DUTY RESTAURANT RANGES

Maximize your 36" cooking space with the American Range 365 Series innovative design. Get the most out of your range top with our 5 burner configuration, featuring a 5th burner in the center and 4 surrounding burners. The 365 Series provides more separation between burners allowing ease of use for larger pots and easy management of multiple entrée preparation - whether its stewing, boiling, blanching, braising, pan frying, or stir frying. A typical 6 burner range will accommodate smaller pots but fails to serve multiple oversized pots conveniently. 32K BTU high efficiency lift off burners provide for instant heat and easy cleaning. The 365 Series is available in Standard, Convection and Innovection oven base. A standard 26.5" oven width and a 32" wide oven configurations available. The 365 Series is equipped with a low island profile back, affording maximization of your space by allowing overhanging pots or pans.
